

Environment Education in School

Helping our students to live a healthier lifestyle

Our Green Campus

- The school has a Strategic Annual Plan, to impart environmental education as well as to adopt sustainability practices. The school believes that today's greatest responsibility is to build environmentally aware future citizens.

Harita Club

- Our school has a Eco Club-*Harita*
- The Club members not only do organic gardening in school but are also sent for awareness programmes in villages near the school.
- • Cleanliness, sanitation and personal hygiene is also an important task of the *Harita* club.

Awareness program in nearby villages and schools of Shankarpur

Children inspecting the site for compost pit in the village

Interview of villagers who are reluctant to have toilets constructed in their home

- Children explained them the importance of self hygiene.

- Students explaining the importance of sanitation and the advantages of using a toilet.

Waste to wealth

- Our school has a fully automated Compost Machine which produces organic manure from kitchen waste and dry leaves.
- Besides the gardeners, the hostel children are also involved in using the machine once in a week.
- The use of organic manure proves beneficial for the plants as well as enhances the fertility of the soil.

Celebration of Van Mahotsav in School

Green House of the school

Organic farming under process at RVN's Green House

Garden of Medicinal Plants in School

Garden of Medicinal Plants

Garden of Medicinal Plants

Sewage Treatment Plant in School

- The Sewage treatment plant of the school recycles the total sewage produced in the campus.
- The recycled water is used for watering plants in the school gardens and fields.
- Students are taken to STP to make them understand the recycling process.
- The infographics drawn on the outer wall of the plant helps the students to know the process of recycling of sewage.

Plogging for a Purpose

- Following the instruction of CBSE, students did plogging in all the major market areas of the town where people usually tend to spend more time and throw plastics packets and bottles. During the plogging activity our students collected a huge trash of plastic waste.
- During this activity, the students also rallied through out the town to create awareness about the ill effects of Plastic. They sparked a purposeful movement in the town to **“Throw Away The Plastic Bags”**.
- Cloth bags were made in the school by the supporting staff and distributed in the market. The students went to all the people in the market using plastic bags and exchanged them with cloth bags. 200 cloth bags were distributed during this activity

Awareness program on Conservation of Water in School

Visit to Pollution Control Board

- Students with the officials of Pollution Control Department who demonstrated the process of measuring the pollutants in the air of Keonjhar Town.

NOTE :

Sadly the pandemic forced us to discontinue the activities of the *Harita* club for the last 2 years.
